

EXO-CORTEX 2.0

Immersive fulldome experience

File : 4Kx4K, 30fps
Audio file : 5.1 / AmbiX 3o 24b

Exo-Cortex 2.0 is an invitation to feel free, guided by a voice that plunges us into a dreamlike and hypnotic introspection. This immersive work was adapted from an immersive experience created for the Bright Festival Connect in the Kunstkraftwerk building at Leipzig in 2022. This fulldome short film offers a dreamlike journey to the spectators through a poetic and bewitching composition of the space. Each stage transforms the venue into complex digital formations that become new 360° moving objects of contemplation.

Part 1: hypnosis session with a visual loop of an infinite tunnel and a robotic voice communicating with us.
Part 2: restructuring the boundaries of space around us
Part 3: levitation, feeling of lightness through lights evolving in a universe made up of bubbles.
Part 4: recompilation of data recreating a hypnotic world through black and white lines.
Part 5: Evaporation of the robotic entity. End of the waking dream.
