SOUND SYSTEM

A 3 ways active (tri-amped) sound system, in 2 channels, capable of 110 dB constant at mix position without distortion and fully covering the audience area. Components should include a 18'' driver for low frequency, a 15'' driver for mids (NEXO PS15, L.ACOUSTICS, MTD115...), and a 1'' or 2'' compression driver for high frequency. The system loudspeakers must be configured as 2 independent channels. The sound board, lighting desk and a video projector will be placed in the middle of the venue. The promoter allows the production crew to determine the location of their equipment. SOUND SYSTEM SHOULD BE IN PLACE AND FUNCTIONAL AT THE TIME OF THE BAND

SOUND CHECK

Sound check time should be 3 hours before the doors open. Installation time is 1 hour. Average sound check time is 1 hour. This should be completed (including lighting) 1 hour before the doors open in order to allow time for
