

TECHNICAL SHEET IMMORTAL(S) - K. DANSE

- 3 powerful video projectors (minimum 4000 lumens, wide lens) (with HDMI long cables), attached on ceiling and projecting towards the 3 surrounding walls.
- 9 light projectors, controlled via a pc: 4 Led on the floor around the igloo, 4 attached on ceiling above the igloo, 1 with thin ray oriented towards the cartel (see attached drawing) + color gels
- Stereo sound adapted to the space (ideally with sub bass)
- Fog machine
- Electricity, extension wires, multiple plugs, adaptors
- Tech booth outside of the space
- Cable floor protectors

The geodesic half sphere, as an igloo, is mounted in location from separate parts, positioned on the floor, in the middle of the space, 2,85 m diameter, 1,80 m high
Most of the equipment is provided by the company : lap top computers, stand for the interactive cartel, accessories, special cables, etc.

C = cartel. It is a stand on which a tactile screen is solidly fixed.

The stand, on wheels, is solidly fixed on the floor, at 1,50 m distance from the igloo.

It is connected via cables to a pc, to be protected (on the floor if tech booth is at long distance).
