4. Place the headset on the viewer's head.
5. Double-click the file "SSB.exe"
6. Select the language.

Inside the experience

- Check that the position of the chair you're sitting on in the real world matches the position of the virtual chair in VR.
- The experience contains audio, don't forget to check if windows is playing the sound in the right device.
- Inside the experience, you will use the triggers on your controllers to grab some of the 3D objects within your reach.
