SPACE EXPERIENCES IN VIRTUAL REALITY

High-fidelity experiences

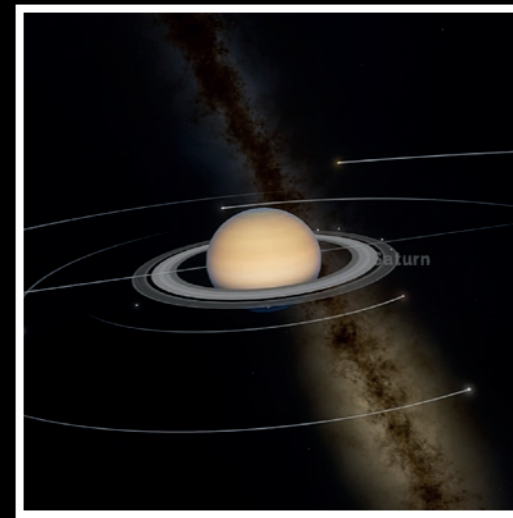

For engagement and education

In 2016, we were the first company to offer virtual spacewalks in zero gravity.

We produce high quality immersive experiences for scientific outreach and education.

Our interactive documentary *OVERVIEW* won the Viveport "Best Education Experience" Award in 2018.

This is the next generation of scientific engagement. Let's build it together.

O V E R V I E W

OVERVIEW: A Walk Through The Universe is an awarded interactive documentary designed for museums and educational institutions. Using data from NASA and ESA, it accurately describes our position in the known Universe.

MOON OPERATIONS

Teleport back to 1969 with this epic room-scale virtual installation. Up to 4 users can re-enact and broadcast *live* the most incredible adventure of mankind: the first steps on the Moon. Beware: cooperation and focus will be required!

VIRTUAL MOON WALK

Virtual Moonwalk is a fun and realistic Lunar gravity simulator for everyone. Our patented system compensates for precisely $5/6^{\text{th}}$ of each user's weight. Immerse yourself in a high-fidelity lunar landscape, and jump exactly as you would on the Moon.

Experiencing true Lunar gravity really feels like being on the Moon.

J.-F. CLERVOY (STS-66, STS-84, STS-103)

ORBITAL VIEWS

— FLY IN SPACE —

Orbital Views is the **first** company in the world to offer virtual experiences in **zero-gravity**. Board a Zero-G plane and float near the ISS, jump on the surface of the Moon, or take your first steps on Mars.
